# EZY2 TRIM SYSTEM

Providing practical production solutions for the Meat Industry over the past 35 years, IBEX delivers a best in class meat removal trimmer, **THE EZY2 TRIM SYSTEM** – the complete system for meat recovery and fat trimming, which offers benefits of increased yields, better profits, improved safety, and improved product appearance.

Available in both Electric and Pneumatic versions the advantages include:

- Improved yields through design resulting in fast Blade cutting speeds
- The fast Blade speeds allow effortless cutting and increases yields significantly by slicing through meat with ease, making bone trimming fast and efficient, while reducing operator effort
- The high power effortlessly tackles any fat removal and meat recovery applications
- Reduced cost of ownership through longer lasting, common parts throughout the Head size range
- One Handpiece for all Trimmer Head sizes (35 to 180)
- Easy to maintain – the IBEX EZY2 Trimmer is easily dismantled and assembled

## EZY2 TRIM HEADS

- Fast Blade Speeds
- New improved Head design with single piece Blade Keeper system
- Quick, simple, and consistent Blade changing procedure reducing down-time
- Common Trimmer Heads for both Electric and Pneumatic Systems
- Improved hygiene through built-in ergonomic thumb rests and use of food grade material
- Universal Head design for left or right hand options

## EZY2 TRIM SYSTEM FEATURES

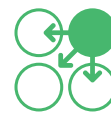

Enhanced system with high power and high speed

Increased yields and Blade performance

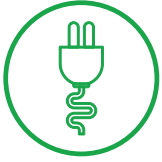

Improved Design

New modular Head design to tackle all trimming applications

Simple and safer to use

## EZY2 TRIM ELECTRIC SYSTEM

The **IBEX EZY2 TRIM Electric System** is engineered with durable, robust components to deliver superior performance with low maintenance costs.

The EZY2 TRIM Electric System has a comprehensive range of Trimmer Heads for meat recovery and fat trimming. This offers benefits of increased productivity & yields, better profits, improved safety and product appearance.

### EZY2 TRIM ELECTRIC TRIMMER BENEFITS

- Multiple Head Compatibility – One Handpiece drives all Trimmer Heads (35,52,69,90,128 & 180)
- Two hand start for improved Operator safety
- Common spare parts across range
- Durable, Flexible drive Cable
- Cables compatible with most existing Motors\* delivering superior Blade speeds
- Powerful, Robust, Hi-Torque Fixed speed Motor for various Trimming applications
- The Electric system is suitable where there is no air supply. Simple to operate and easier to install.

Electric Handle

Motor

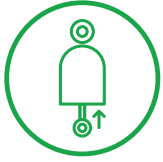

Cable

### ADDITIONAL BENEFIT

The **IBEX EZY2 TRIM** system fits into most existing Trimmer drive Motors\*.

With little change to your current production setup and minimal investment, it is easy to change to the IBEX EZY2 TRIM Electric System. Simply swap out the current Head Assembly, Hand Piece and Flex Shaft Cable with the EZY2 TRIM and plug it into your current Trimmer Motor\*.

## EZY2 TRIM PNEUMATIC SYSTEM

The **IBEX EZY2 TRIM Pneumatic** is the ultimate in Pneumatic Trimming systems in the market. At the heart of the Pneumatic Trimming System is the IBEX Pneumatic motor; precision built to use air efficiently and deliver high levels of power and speed.

The distinct advantage of the EZY2 TRIM Pneumatic system is its high speed coupled with the power enabling it to be used in numerous applications to improve yields.

### EZY2 TRIM PNEUMATIC TRIMMER BENEFITS

- Powerful drive system makes light work of most trimming applications
- Precision built Pneumatic Motor using efficient use of air in delivering optimum levels of torque and speed
- Smoother, cleaner cuts with reduced operator effort
- Multiple Head compatibility – one Handpiece can drive all IBEX Trimmer Heads (35, 52, 69, 90, 128 & 180mm)
- Two-hand start Handpieces for improved operator safety
- Robust and simple in design requiring minimal maintenance
- Interchangeable parts
- Plug in anywhere there is air supply

## S6000 BLADE SHARPENER

With easy operation and universal compatibility, the New S6000 Sharpener hones IBEX Circular Trimmer Blades, enhancing Blade life and delivering a cleaner cut for the IBEX Trimming System.

The S6000 is the superior alternative to current hand stoning techniques for sharpening circular trimmer Blades. With total Blade control during the grinding process, the S6000 provides smooth consistent sharpening, resulting in a razor-sharp edge.

With a single magnetic Blade holder, which accommodates all Blade sizes\*, the S6000 is an easy to operate, low maintenance sharpening tool.

## TRIMMER HEAD HONING DEVICE

Maintain razor-sharp edge during processing with the Trimmer Head Honing Device. With the push of the button the device removes the rolled edge on the inside, so the Blade is back to optimum performance.

The Honing Device is available as an option on the 90 and 128 Trimmer Heads.

## DEPTH GAUGE RANGE

Maximise your yields with a choice of Depth Gauges for the 90 and 128 Trimmer Heads for precision cutting. Trim just the right amount of product every time whether the application is removing fat or skin.

The Depth Gauges are also available with

- Honing Devices to combine accurate cuts with the benefit of maintaining a sharp edge
- In food grade material and now available in hooked and complete shapes

## OTHER ACCESSORIES AVAILABLE

Vacuum attachments for 35 and 52 Heads are now available in a single piece design and in 45/90 degree angles.

Thumb Rest, Grease Cup and Hand Strap\*\*

\*Except the 180 Blade \*\*Hand strap for electric system only

# IBEX TRIMMER BLADES

In addition to the standard Blades which are made of carbon steel, the **IBEX Trimmer Blades** are available in the knife quality stainless steel. This means the Blades stay sharp for a longer time, increasing production and reducing downtime for honing to maintain an edge.
